Mr. John W. Parker
Field Research Archeologist
P.O. Box 3756
Clearlake Highlands, CA 95422

Dear John:

In regards to the Anderson Marsh archeological area within Lake County, The Lake County Chamber of Commerce is very interested in preserving the historical heritage of our County.

We feel the project and the area that you have outlined is of vital importance to the preservation of the recorded history that has taken place in centuries past. To devastate this area with building complexes would merely destroy a part of history that could never be reclaimed.

We encourage you to press forward with your endeavors and to call on us at any time for assistance.

We also give you permission to use this letter in an attempt to dramatize our concern and encourage anyone who you may come in contact with who has any interest concerning our views on this matter to feel free to contact us.

Sincerely,

Edwin A. Rogers
General Manager
